

# Informatics Skunkworks

## What

- Student research group working together to **learn and apply the transformative power of informatics** (e.g., data science, machine learning, data mining, artificial intelligence, ...)

## Why

- Data science is changing our world, from self-driving cars to real-time language translation. Come join us and be part of it! **Learn advanced data science, domain specific, and teamwork skills. Interact with faculty and industry.**

## How

- Commitment ideally at least 10h/wk for a year but class projects also welcome. **We can supply problems, or work with yours.** Research credits possible. We are primarily an undergraduate group but all ages and diverse backgrounds are welcome.

**Please Join Us!**
